

## Guest lectures of AMIDD 2025

**Dr. Martha Serrano** is a Principal Scientist at the Center of Excellence, Computational Biology & Medicine, Research Oncology, Pharma Research & Early Development (pRED), F. Hoffmann-La Roche Ltd. Check out her [LinkedIn profile](#), and her self-introduction:

I am a passionate and curious evolutionary biologist with over 7 years of experience in pharmaceutical R&D, primarily, but not exclusively, in bioinformatics, omics data analysis, and oncology research. I thrive on communication and building collaborations, often starting with a simple, "Let's have a coffee—I'm curious to learn about what you do." I strongly believe that curiosity fuels our journey of growth, reminding us that wisdom can be found in both great minds and humble perspectives, as every interaction broadens our understanding of the world.

**Dr. Chih-hsuan Hsin** is a Senior Scientist and Clinical Pharmacometrician working in the Predictive Modeling chapter, Pharmaceutical Sciences (PS), Pharma Research & Early Development (pRED), F. Hoffmann-La Roche Ltd. Her biography:

Chih-hsuan Hsin is a certified pharmacist in Taiwan and holds a PhD in Clinical Pharmacology from the University of Cologne, which was obtained in collaboration with the Bayer graduate program in Pharmacology and Experimental Therapeutics. Additionally, she possesses an MSc in Focus Pharmacy from the University of Würzburg and a Certificate in Pharmacometrics from the University of North Texas Health Science Center. Prior to her tenure at Roche, commencing in January 2024, she was employed as a Modeling and Simulation Scientist at Idorsia Pharmaceuticals Ltd.
